Andrea's Quick Take On All Things...

ESG & TECHNOLOGY

November 21, 2021

#COP26 - Cop Out or Lean In?

(c) Andrea Bonime-Blanc 2021. All rights reserved.

Dear Friends,

[COP26 - leadership cop-out or lean-in?](#) To understand some of the dynamics and results of this monumental global climate effort, please read my literally hot off the digital presses [article for Diplomatic Courier here](#). (I'm also honored to have recently been [named a Contributor](#) to Diplomatic Courier's global affairs roster.)

Here are a number of additional resources on all things ESGT:

- I was interviewed for an excellent [InformationWeek article connecting cyber resilience and climate change](#). Check it out [here](#).
- Speaking of cyber - [here's the Advisen/ISS webinar on Cyber ESG Reporting](#) and Disclosure trends I recently did based partly on the [Swiss Re/GEC Risk White Paper](#) Maya Bundt and I wrote last year on Cyber ESG Reporting.
- I'm delighted to share that the ESGT concept is catching on internationally especially amongst technologists - check out my #FISWEEK keynote & panel on "ESG+T Boosting Innovation through Technology" in Brazil, billed as the first Latin America-wide healthcare ESG tech forum - see it in [English](#), [Portuguese](#) or [Spanish](#)
- Also in Spanish, here's my [podcast about Reputation with Corporate Excellence - Centre for Reputation Leadership](#) with my dear friend, Angel Alloza, their executive director and founder, on the occasion of their 10th anniversary (I've proudly been on their Advisory Board for 7 of these 10 years).

See you for our final newsletter of the year right before the holidays in late December!

Stay well, stay safe, be happy.

All the best,

[Andrea](#)

GLASGOW'S COP26 MEETING: COPOUT OR LEAN-IN?
Article in Diplomatic Courier

GLOBAL ENVIRONMENT

COP OUT OR LEAN IN? LEADERSHIP TACTICS FOR THE NEW CLIMATE ZEITGEIST

BY ANDREA BONIME-BLANC .

The COP26 Globe at the Hydro. Photo by Karwai Tang/ UK Government.

CLIMATE CHANGE ENCAPSULATED:

- *We're at 1.1C above pre-Industrial Revolution temperature levels.*
- *Doing nothing or little, we will reach +1.5 soon—before 2030.*
- *If we're lucky we'll get to +1.8 by 2050 if we do everything right starting now.*
- *Barbados stated that: "2 degrees is a death sentence."*
- *If we do nothing, we could reach +2.4 by 2050.*
- *If we do nothing, we could reach +5C in 2100.*

OVERHEARD IN GLASGOW:

- *"History has been made here in Glasgow"*
- *"We've kept 1.5 alive though on life support"*
- *"There's real progress and it's not enough"*
- *"Blah, blah, blah"*

"BLAH, BLAH, BLAH" OR SOMETHING ELSE?

INFORMATION WEEK ARTICLE/INTERVIEW ON THE
CONNECTION OF CLIMATE & CYBER RESILIENCE

Security & Risk Strategy

Feature

How Climate Change is Changing Cyber Resilience Plans

With companies and cloud providers fending off wildfires, floods, mudslides, ice storms, hurricanes, and heat waves, how are CIOs/CTOs supposed to promise a resilient architecture?
